Mathematics and Computer Science at NMU

The primary mission of the Mathematics and Computer Science Department is to prepare students for participation in professional careers in mathematics, mathematics education, and computer science, while providing service and liberal studies courses for the broader university community. In addition, the department contributes to the continuing education of K-12 teachers in the region. The department also offers a master's degree in mathematics education.

Successful completion of a computer science, mathematics or mathematics education major prepares students for graduate work in mathematics or computer science and for professions in statistics, applied mathematics, computer science and teaching. The study of mathematics develops the critical and analytical skills needed in medicine, law or business, and supports majors such as physics, chemistry, biology, psychology, economics, sociology, or geography. It provides an understanding of the contributions of mathematics to philosophy, the arts, science and technology, and provides an exciting intellectual experience.

Student Organizations

- Mathematics and Computer Science Club
- Student Chapter of the Association for Computing Machinery
- Student Michigan Education Association

Department/Program Policies

To ensure student success the department does not allow students to enroll in the same course more than two times. If a student must take a course for the third time, he or she must first take the prerequisite course(s) and obtain a grade of "B-" or better in each.

All non-teaching majors and minors offered by the department require a 2.00 or higher overall grade point average in required courses and a grade of "C" or better in each required course.

All students must pass prerequisite courses with a grade of "C-" or higher unless otherwise indicated.

Students majoring in secondary education mathematics or minoring in secondary education mathematics must maintain a grade point average of 2.70 or greater with no grade below a "C" in the professional education sequence, the major and/or minors and required cognates combined.

Mathematics courses with a middle digit of "5" will not count toward the requirements of a non-education major or minor. Students pursuing minors in the department are urged to consult with their adviser in determining an appropriate selection of courses.

BACHELOR DEGREE PROGRAMS

Liberal Studies: Complete information on the liberal studies requirements and additional graduation requirements, including the health promotion requirement, is in the "Liberal Studies Program and Graduation Requirements" section of this bulletin (38-44).

Courses within each major that can be used to satisfy liberal studies requirements are listed with the roman numeral (in brackets) that coincides with the liberal studies division the course falls under.

Applied Mathematics Major

With an emphasis on the fundamental nature and function of mathematical modeling, this major combines computational techniques with computer-based problem solving in a variety of applications. Graduates of this program are provided with the foundation to either join the professional workforce or continue their studies at the graduate level. A computer science minor is built into this major.

CS 222 Data Structures	4
CS 326 Software Design and Engineering	3
Mathematics/Computer Science Electives	10
<i>Choose from the following:</i>	
MA 340 Combinatorics (4 cr.)	
MA 381 Integer Programming and Network Flows (3 cr.)	
MA 410 Mathematical Modeling (3 cr.)	
MA 462 Higher Mathematics for the Sciences (3 cr.)	
MA 472 Advanced Applied Statistics (3 cr.)	

MA 475 Intermediate Statistics (4 cr.)	
MA 485 Stochastic Models in Operations Research (3 cr.)	
MA 491 Internship in Applied Mathematics (3-6 cr.)	
CS 228 Network Programming (3 cr.)	
CS 322 Principles of Programming Languages (4 cr.)	
CS 422 Algorithms Design and Analysis (3 cr.)	

Minor* **20**

*Computer science may be declared as the minor without further course requirement if at least five credits of electives are in computer science.

Computer Science Major

This major combines courses in practical programming, computer architecture, networking and algorithm design/analysis with an appropriate background in mathematics and theory of computing. Included are classes covering the latest technologies such as robotics and Internet applications. This major provides the foundation for a rewarding and productive career in industry as well as strong preparation for graduate school.

Network Computing Major

This major is designed to offer students an education in the important world of Internet and Intranet programming. This course of study emphasizes programming skills while concentrating on the latest concepts, architecture and algorithms for network computation. Students will learn the fundamentals of computer science while focusing on aspects important to the world of network computing.
