

Management

Do you like being a leader? Do you like to organize/manage tasks with others? Are you willing to take criticism and not let it bring you down? If you answered “yes” to these questions, then maybe a career in management is for you.

A manager is trained to apply his/her analytical skills to the problems facing institutions and businesses while developing an understanding of today’s world. The career possibilities available to a Management major are therefore vast. The career you choose will depend on the competencies and skills you acquire through your academic work and extracurricular activities.

Skills and Competencies

Like other degrees, you will be exposed to a variety of academic coursework as a Management major. In the process, you will acquire new skills. Specifically, your communication, analytical, technical, and computer skills will be challenged and strengthened. Strong communication skills are, after all, necessary in every career field today. Management is no exception. You will need to develop effective writing skills, as well as oral presentation, persuasiveness, and computer and data analytic skills. Leadership and public relation skills are also important. The ability to think critically, solve problems, and negotiate are important in this field, too. You can expect to be exposed to academic coursework and experiences that challenge you to further develop these skills. The curriculum at NMU prepares students for the broad professional fields of management, or for graduate studies.

Course Work

This degree includes the following courses as part of the program requirements, and specific major requirements along with general education courses and graduation requirements.

Business Core

- ACT230 Principles of Accounting I (4 cr.)
- ACT240 Principles of Accounting II (4 cr.)

Detailed course descriptions can be found at www.nmu.edu/bulletin.

Career Development

You should begin the resume-building process as soon as you can. The Academic and Career Advisement Center can assist you with career planning, while Career Services will help you fine tune your resume and look for jobs related to your field. In the meantime, the more hands-on experience you have, the better the chances are that you will find a job. Becoming involved in a professional related internship is a way to develop your professional skills and gain experience. Your academic course work is important as well, so be sure to maintain a high grade point average.

Additional Considerations

You can gain excellent experience in the management fields by finding an internship related to your interests.

Additional education may be required for some of the listed positions.

Remember to take any necessary exams early; it can take six weeks for results to be sent to the schools for which you applied.

Job Outlook

The management field is expected to continue steady growth at a 12% rate. Salaries greatly vary with experience and field, but generally range from \$40,000 to \$60,000 on average.
