

Anthropology

Anthropology is the study of humans both, past and present. Anthropology builds on the knowledge from social and biological sciences as well as the humanities and physical sciences.

Anthropology uses the perspectives of sociocultural anthropology, biological/physical anthropology, archaeology, and linguistic anthropology.

A degree in Anthropology prepares you for a variety of employment opportunities and for graduate study. One could apply their knowledge to community and urban studies, aging, criminology, delinquency, populations, health, minorities, or family services.

Research design and data analysis skills acquired in the Anthropology Major are applicable in nearly all professions.

Skills and Competencies

The Anthropology Major will expose you to courses and insights that will positively influence your understanding of the world. In the process, you will acquire new skills. Your interpersonal communication, ability to explain and conduct research, knowledge of community resources, language skills, ability to make decisions, and ability to maintain composure in trying situations will be developed. Training in basic statistics and research methods is essential for most social scientists. Anthropology majors are able to design projects and policies, gather information, analyze data, and present reports to decision-makers in both public and private organizations. They are able to make a difference. Objectivity, open-mindedness, and systematic work habits are also important in all kinds of science research.

Course Work

This degree includes the following courses as part of the program requirements, and specific major requirements along with general education courses and graduation requirements.

Theory and Methods Core

AN440 History of Anthropology (4cr.)
AN470 Culture and Power (4cr.)

AN495 Special Topics in Anthropology (4cr.)
AN498 Direct Study in Anthropology (1-4cr.)
GC225 Intro. to Maps (2cr.)

Required Minor (20 cr.)

Detailed course descriptions can be found at www.nmu.edu/bulletin.

Career Development

You should begin the resume-building process as soon as you can. The Academic and Career Advisement Center can assist you with career planning, while Career Services will help you fine tune your resume and look for jobs related to your field. In the meantime, the more hands-on experience you have, the better the chances are that you will find a job. Becoming involved in a professional related internship is a way to develop your professional skills and gain experience. Your academic course work is important as well, so be sure to maintain a high grade point average.

Additional Considerations

Some occupations are often accompanied by excellent benefits, but many require education beyond a Bachelor's degree.

Good verbal/written communication skills, and organization skills are beneficial to these occupations. Strong analytical skills and ability to make decisions quickly are required in many of these occupations. Several require education or experience beyond the baccalaureate level.

These occupations carry rewarding experiences, but require much patience. Most require a degree beyond the baccalaureate level.

Job Outlook

Starting salaries are contingent upon geographic location and individual work experience. Most of the new careers will involve data processing and information handling.

Potential Careers

NMU's Anthropology Program prepares students for employment in the following careers:

Advertising
Bureau of Statistics
Census Bureau
