

Sharing a document camera in Zoom

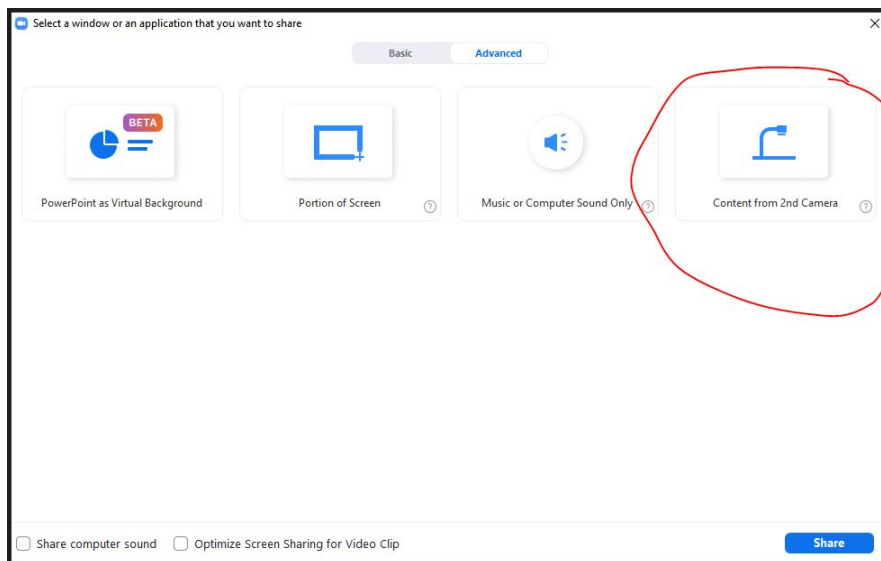

1. Connect a document camera to the computer with a USB cable.
2. Click the **Share Screen** button located in your meeting controls.

3. Select advanced tab.

4. Choose **Content from 2nd Camera**: Share a secondary camera connected to your computer; for example, a document camera or the integrated camera on your laptop.

5. Click **Share**.
 - Zoom will automatically switch to full screen to optimize the shared screen view. To exit full-screen, click **Exit Full Screen** in the top-right corner or press the **Esc** key.
 - Click **Switch Camera** in the top-left corner to switch between any connected cameras.
