# What's on students minds?

## On campus employment

Students are starting to notice the short staffed areas on campus.  
We need student employees

## Student safety

There has been talk about wanting to see updates to the hazing policy.

Students want to see an easier/more transparent process when a safety concern is expressed

## Wellbeing

This semester has been particularly hard on students with thanksgiving break being so late and election stress, Wellbeing has been doing a great job getting involved to help students!

## 2024 Election

Many students registered to vote for this first time!  
Election stress was really tough on students this year.

## Period Project

ASNMU's Period project has been a huge success this semester.

There is a severe need for period products on campus. It is hard to keep up with demand

## Winter activities

Students have been loving the crafty events on campus and want to see more during the winter semester when things start to die down.
