

Clearing Browser Cache

For a quick tutorial

<https://www.youtube.com/watch?v=-kJvSmlLC28>

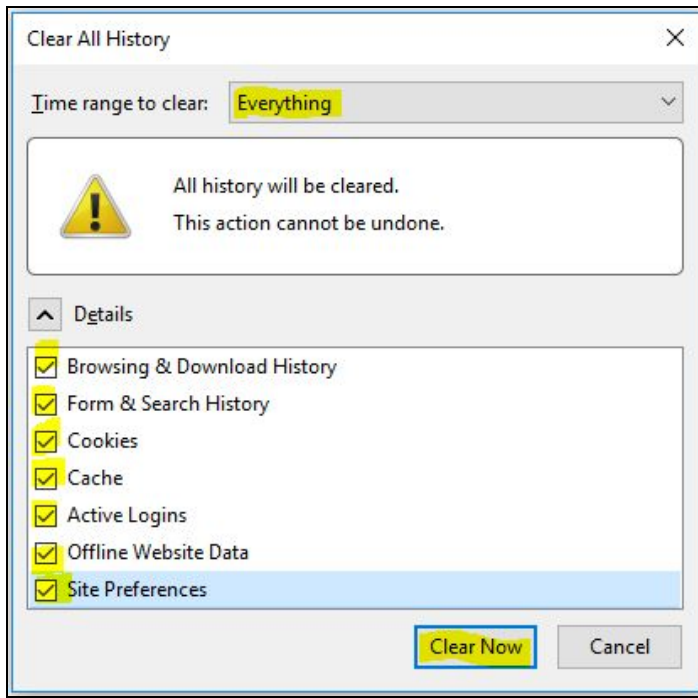

Chrome

Open Chrome history (press: Ctrl + h) and select 'Clear browsing data' on the lefthand side. This will open a window that will allow you to select a time range and what you want to clear. Select 'All time' and make sure all boxes have been checked for removal before selecting 'Clear Data'. Do not click on the Advanced tab, as you may end up erasing saved passwords or other important user information. Restart the browser and continue testing.

FireFox

Open Clear recent history (press: Ctrl + Shift + Delete) from the menu. For the time range to clear, select 'Everything'. In the Details dropdown, check all the boxes and select 'Clear Now'. Restart the browser and continue testing.

Internet Explorer

Open Delete browsing history (press: Ctrl + Shift + Delete). **Uncheck:** Preserve favorites website data, Form Data, Passwords, and Tracking Protection. **Check:** Temporary Internet Files and website files, Cookies and website data, History, and Download history. Then select 'Delete' and restart the browser to continue testing.

Delete Browsing History

- Preserve Favorites website data**
Keep cookies and temporary Internet files that enable your favorite websites to retain preferences and display faster.

- Temporary Internet files and website files**
Copies of webpages, images, and media that are saved for faster viewing.
- Cookies and website data**
Files or databases stored on your computer by websites to save preferences or improve website performance.
- History**
List of websites you have visited.
- Download History**
List of files you have downloaded.
- Form data**
Saved information that you have typed into forms.
- Passwords**
Saved passwords that are automatically filled in when you sign in to a website you've previously visited.
- Tracking Protection, ActiveX Filtering and Do Not Track**
A list of websites excluded from filtering, data used by Tracking Protection to detect where sites might automatically be sharing details about your visit, and exceptions to Do Not Track requests.
