

Printing

Suggestions from Pam, 1/24/19, to reduce fuzzy, gray figures:

- Don't use the Banner print function.
- Use the Chrome print function instead.
- Go to the advanced settings and select the Headers and Footers checkbox - uncheck the others.
- Set the scale to 70.

100% better. Doesn't print out any of the gray background and puts the date on the top of your printout.
