Welcome to Temptation Island

JIM SCOTT '87

Television viewers who indulged in the guilty pleasure of *Temptation Island* couldn't help but notice the gorgeous scenery. We're not referring to the bronzed and sculpted participants, but the natural resources of Belize. With its white coral sandy beaches and dense palm trees, the country has become a popular backdrop for music videos, commercials, television programs, and movies.

Jim Scott (center) welcomes visitors to his corner of paradise.

It's a view **Jim Scott '87** enjoys and markets on a daily basis. As general manager of the Journey's End Resort, Scott hosted the entire *Temptation Island* production crew; the cast stayed at a couple of nearby resorts.

"I was hired on a retainer for a month and managed the logistical itinerary for the cast and crew in terms of transportation and expeditions," he said. "They chose Belize because of its proximity to the United States and its diversity in terms of natural surroundings and culture. I had these people caving, horseback riding, snorkeling, repelling, hiking, and fishing all over Belize. It was great exposure for the area."

Like any good story, this one had a climactic ending as well. Hurricane Keith hit the island just after shooting wrapped, but before the crew had checked out.

"The island I live on (Ambergris Caye) is so narrow that I can hit water with two throws of a football from one side to the other. We were held up in 10 rooms on the second story and watched the island disappear, except for the

trees. Winds were up to 130 knots and 40-foot coconut trees were parallel to the ground. I think I became somewhat of an actor, because I knew my staff's and guests' fear would be exponentially greater than mine, so I pretended everything would be all right."

Scott traveled to Belize in 1987 as a Peace Corps volunteer. He began working in the tourism industry two years later. His wife, Debbie — a

native of the country — works in the same field, specializing in Web site design and management. The couple has two children: Alina, 6; and Alistair, 5.

A few familiar faces from NMU's past and present have traveled to the Journey's End Resort over the years. Scott said he "would like to see more Yoopers down here." He is now busy embarking on a new business enterprise.

"I will be building and managing my own fly-fishing adventure center in southern Belize starting this year," he said. "It will offer high-end clientele a rustic experience with creature comforts — very exotic."

Scott can still reflect on hosting the crew of one of the most talked-about network programs of the season. He will have to rely on his memory, though. Scott hasn't owned a television in 10 years. Why should he? No reason to live vicariously through the small screen when a tropical paradise looms large right outside your door.

Staying Longer than Expected

SACHIKO WILLIS '92

John Lennon once said that life is what happens while you are making other plans. That seems to be a fitting epigram for **Sachiko (Nishizawa) Willis '92**. She came to NMU as a foreign exchange student from Yokaichi, Marquette's sister city in Japan. What started as a one-year scholarship program turned into a life-altering experience and a career more than eight thousand miles away from her homeland.

"Shelley Russell [NMU theater professor] gets the blame," Sachiko joked. "She's the one who cast me, so she gets the blame."

Other than the opportunity to learn in another country, Sachiko didn't have any concrete goals when she came to the United States. That changed near the end of her scholarship year at Northern when she met a couple of actors from NMU's Theatre Department. They convinced her to audition for Russell's production of *A Midsummer Night's Dream*, and, to her surprise, she got a part as one of the fairies. It was her first stage experience, and it changed the course of her life.

"That's when — as they say — 'the bug bit me,'" Sachiko said. "Ever since then, I've known that this is what I want to do."

Sachiko went back to Japan for eight months to finish her studies and then planned to return to Northern for one semester to explore her new-found interest in theater.

But once again, Shelley Russell and another friend in the Theatre Department intervened. They told Sachiko if she could get an on-campus job, find an inexpensive place to live, and get as many scholarships as possible, she could stay and finish a degree at Northern. Although a daunting set of tasks, Sachiko's enthusiasm was piqued, and she was convinced. She stayed and has been living in the United States ever since.

"Shelley was very helpful in introducing me into this new world," Sachiko said. "Her energy, her passion —

everything — carried me through this whole process. She's one of my role models."

After graduating from Northern, Sachiko's interests shifted from acting to the theoretical and behind-the-scenes aspects of the theater industry. She went on to earn a master's degree in theater theory from Miami University. While in Ohio, she met her husband Jack, who is also an actor.

The couple moved to New York three years ago when Sachiko's husband was cast in the Broadway show *Old*

Neighborhood. She started working as an intern for The Acting Company, a touring company out of Juilliard, and was soon given an interim position as company manager. She then worked as a communications associate for the Pan American Repertory Theatre — one of the oldest Asian American theater companies in America. Now she's the general manager of Ping Chong and Company and Pickup Performance Company, both non-profit, touring experimental arts organizations.

While Sachiko and her husband hadn't planned on staying in New York, it now looks like they'll be there for a while. Sachiko is energized by her job and the creativity of her boss and the artists she works with. She said the management side of theater suits her character. And her husband was recently cast as Menelaus in the off-Broadway production of *Troilus and Cressida*.

While it's hard to say with certainty, Sachiko believes her life in the United States is better than it would have been had she stayed in Japan.

"I don't think I would have had as many options," she said. "Theater is not as highly regarded in Japan, so it might have been much more difficult. My parents still ask, 'When you grow up, what are you going to do?' They don't believe that I actually get paid for this."

Why we're members of the NMU Alumni Association.

Kathleen (Lahtinen) Frazier '86 and Kurt Lahtinen '95

Alumni Association members since 1997 and 1998.

"Three generations and counting! We've had members of our family attending NMU over the last nine decades.

Grandparents, parents, aunts, uncles, cousins, and siblings have all attended or graduated from Northern. In fact, at one time in the 1970s, I remember all three of us (grandmother, mother, and daughter) standing in line to register for classes together!

Because so many of our family memories are linked to Northern, we feel a strong tie to this university. Early in our lives, our grandmother instilled in us the value of education. We learned the importance of doing our best, continuing to learn, and giving back. To honor her lifetime of encouragement for our academic pursuits, we established the Elsie O. Treves Mayhew Scholarship. Attending Northern helped all of us find success in our lives. Now it is our turn to help others achieve their aspirations and realize their successes. How do we do this? By staying involved with NMU activities, by supporting the Alumni Association programs and services through our annual memberships, and by creating a student scholarship to honor the woman who started our family's Northern tradition. Northern is a part of our lives — it's as simple as that."
